

A REALLY BIG TEST

ISAT

is a really big test.

Yes, a test where I have to do my very best.
Know the where's, the what's and the who's,
Find the answers in the context clues.
Decide what's right and what is wrong and
let everyone know that I am strong.
Reading and Math I am familiar with,
And passing this test proves I am the best.

SCHOOL ROCKS

Jazzin' with math can make reading a blast!

Shoutin' your name won't get you the blame, but toutin' your horn will
develop your brain!

School is a foundation for laying the path, to your rockin' future,
making it a blast!

Start your day positive. Learn your P's and Q's. Make reading and
writing a prerogative and math will be bumpin' a groove.

School is what it's all about, so make this year your best. Work hard on
your tests, have fun along the way and remember that rockin' and
jazzin' in learning could take you to the moon...and give you a name!

Develop these skills, get your math down pat. Use your reading and
writing to lead you to the right path.

Without all of these, your brain might be mush, so push on...it's a
definite must.

Your teacher is your guide, and books are drums. Beat on, and use
them while you are having fun!

School Rocks while you're learning!

A Closed Book

A book closed, does you no good, unless you are carrying it to make you feel good.

A book that is opened, gives you the world, carry on and make it like it should.

Reading a book and learning what's there is very important and should make you care.

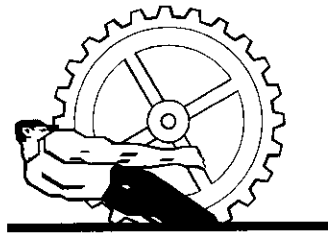

Reading a book and understanding its value gives you the opportunity to make your life fair.

Connecting to prior knowledge, visualizing the words, questioning the motives and adding rich words, makes the text seem important, bigger than most, start the book at the beginning and thirst for the most.

Unclog The Cogs

Unclog the cogs, get the wheels
turning your brain on, can get you
moving.

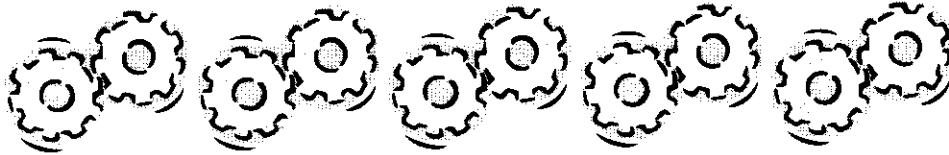

Wishful thinking, daydreaming too,
won't get you going, only an
education will do!

So get up, learn, pretend if you
must, just remember learning for
real, won't be a bust!

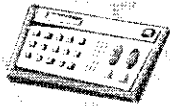

By Shelley Vargas

BRAIN WHEELS

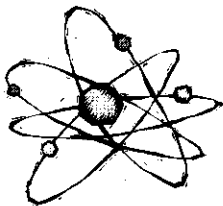

Get those wheels turning; rev up the pace, your brain filling up will make you feel great! Fill it with sense (common that is), divide it, multiply it to make it all good!

Add in some math and reading too, and subtract all the negatives and then it should be you.

Science is great, and will make you understand, how important you are in this great big land.

Be aware of all, keep learning and trying, and you will stop at nothing to keep you going further and not crying.

EMPOWERED

I am **EMPOWERED** to do what needs to be done.

Learning what I need to know is something that should be done.

I can do this...

I can do that...

I do not think about it, I just do it and that's that!

Empowering myself to be what I can be, the best, the smartest, is all I can see.

I get the power from reading and learning to write. I get the power from Science and Social Studies and all things right. I can be what I want to be, so EMPOWER me to be me.
